

# The Power of Laser Dentistry in Pediatrics: From Everyday Care to Frenectomies

Join Dr. Jared Poplin, a board-certified pediatric dentist, for an in-depth exploration of how laser dentistry is elevating pediatric care—especially for frenectomies. In this engaging and clinically focused session, Dr. Poplin will discuss the science behind the 9.3-micron CO<sub>2</sub> laser, demonstrating its ability to deliver efficient anesthesia-free restorative dentistry and blood-free soft tissue procedures with minimal discomfort.
