Exceptional Results Come from Simplicity: Using New Endodontic & Restorative Technologies to Treat Even The Most Challenging Cases

Friday, October 3, 2025 | 8:00 AM-3:00 PM

Hilton Pensacola Beach
12 Via De Luna Dr Pensacola Beach, FL 32561

Cost: \$150
Kerr provides all course materials.

Simplified systems and protocols lend themselves to successful outcomes. New materials and technology allow for complex cases to be treated more easily and allow clinicians to provide patients with exceptional care. From cosmetic restorations to endodontic therapy, participants will learn how to improve efficiency, streamline procedures, and get predictable.

Learning Objectives:

- Learn how to perform easy, lifelike direct composite restorations and how to simplify their bonding protocol while using their preferred technique.
- Review important characteristics when selecting a cement as it relates to bond strengths, color stability, and cement cleanup for long term success of the restorations and surrounding tissue health.
- Gain further understanding of the principles and workflow of endodontic therapy and learn a systematic approach for diagnosis and minimally invasive treatment.
- Participants will learn the importance of glide path, minimally invasive root canal therapy, and three dimensional obturation.

Presented by: Dr. Matthew Miller

Dr. Matthew Miller is a national and international lecturer and has been published in Inside Dentistry as well as multiple white papers on the subjects of endodontics and restorative dentistry. He received his undergraduate degree from the University of North Carolina at Chapel Hill in 2003, and his Doctorate of Dental Surgery with High Distinction from New York University College of Dentistry in 2007. Dr. Miller is continuously studying and learning to improve his work and was approached by KaVo Kerr to be a member of their Endodontic Advisory Board in 2016, and is also now a member of their Restorative Advisory Board as well. He has since been named a Key Opinion Leader in the industry and plays an important role in the development of dental materials, equipment, and technology. He also consults and lectures on 3D imaging technology and advancements in endodontic therapy, restorative techniques and materials including root canal file and obturation systems, cements, fillings, and bonding. Dr. Miller serves as a clinical trainer for dentists and dental professionals. He is also a clinical evaluator and consultant for The Dental Advisor and is a member of their editorial board. Dr. Miller maintains a private group practice in Huntersville, NC, where he specializes in cosmetic restorative and complex dental treatment.
