

Advanced connections between airway health and orthodontics

Back by popular demand! Join Ben Miraglia, DDS, to deepen your understanding of the role general dentists can play in helping patients find relief from sleep disordered breathing (SDB) and other airway health concerns. Whether you need strategies for talking about airway with patients or have questions about the nuances of airway treatment planning, Dr. Miraglia is prepared to cover it all.

INSTRUCTOR

Ben Miraglia, DDS

Vice President of Clinical Education
at CandidPro

Dr. Ben Miraglia is a graduate of the State University of New York at Buffalo School of Dental Medicine and has been practicing dentistry in Mt. Kisco, NY, for 29 years, including 17 years offering interceptive orthodontics. He is widely recognized for his lectures and continuing education courses focusing on clear aligner therapy and craniofacial growth and development related to sleep-disordered breathing.

COURSE DESCRIPTION

This course covers techniques for addressing patients presenting with signs and symptoms of sleep disordered breathing (SDB) and/or obstructive sleep apnea (OSA). Participants will review the signs and symptoms of SDB and OSA, explore how to bring up airway concerns with patients, and learn how results from airway-friendly clear aligner therapy may differ from traditional methods.

COURSE OBJECTIVES

- 01 Evaluate the connections between malocclusion and airway health concerns
- 02 Review methods for diagnosing and treating malocclusion, SDB, and OSA in your patients
- 03 Discuss strategies for incorporating airway assessments into your practice workflow
- 04 Understand treatment planning protocols that prioritize airway
- 05 Review airway orthodontic cases selected by Dr. Miraglia
