

THE IMPLANT CASES YOU SHOULD BE DOING

Simple, Profitable Cases You Can Start Placing Now

INTRODUCTION TO IMPLANT PLACING FEATURING LIVE SURGICAL COURSE

This 2-day clinical program is designed to empower clinicians with the skills and confidence to successfully integrate dental implants into their practice. Participants will receive expert guidance while learning step-by-step protocols for case selection, CBCT interpretation, surgical placement, and strategies to avoid common complications. The course also covers clinical case reviews, along with a comparison of digital and analog restorative workflows. Day 2 includes a live patient surgery, where participants will have the opportunity to place implants and gain hands-on experience through expert mentorship.

OBJECTIVES

- Understand case selection and screening criteria
- Learn single-tooth implant placement techniques
- Interpret CBCT scans for implant planning
- Review treatment planning and clinical cases
- Perform step-by-step implant placement
- Recognize and avoid procedural pitfalls
- Understand the restoration process (digital and analog)
- Review the biological principal of healing and bone regeneration

Live surgeries will be performed by Missouri-licensed dentists in a collaborative, mentorship-driven setting led by expert clinicians. Out-of-state participants, please inquire about licensure.

Attendees may bring their own patient (pending eligibility) and are encouraged to invite their lead dental assistant to join.

AGENDA

Day 1: Didactic Learning

Time: 8:00AM - 5:00PM

Format: Classroom-based learning

Location: 100 West Dental
13759 Manchester Rd Balwin, MO
63011

Day 2: Hands-On Surgical Training

Time: 8:00AM - 3:00 PM

Format: Live Surgical Experience

Location: 100 West Dental
13759 Manchester Rd Balwin, MO
63011

HOTEL RECOMMENDATIONS

*Please note that no room blocks have been reserved at either hotel

Double Tree by Hilton

Hotel St. Louis - Westpoint

IMPLANT TRAINING COURSE AGENDA

DAY 1: Foundational Learning + Hands-On Workshop

Time: 8:00 AM – 5:00 PM

Location: 100 West Dental
13759 Manchester Rd Balwin, MO 63011

MORNING SESSION

Implants 101: Core Concepts

- Osseointegration principles
- Bone-level implants & anatomy
- Micro-gap, platform switching, micromovement
- Why dental implants?
- Integrating implants into your practice

Patient Evaluation & Medical Considerations

- Implant-specific chief complaints
- Intraoral exam & Records
- Identifying medical contraindications

Radiology, Anatomy & Case Planning

- Standard of care in diagnostics
- CBCT vs. Panoramic imaging
- Bone density & ridge width evaluation
- Depth, sinus lifts, and implant size selection
- Guided vs. freehand surgery

AFTERNOON SESSION

Pre-Operative Planning & Surgical Protocols

- Pre-op antibiotics
- Day-of-surgery workflow
- Flap vs. tissue punch techniques
- Implant kits & instrumentation
- Placement techniques, abutments, suturing
- Radiofrequency & staged procedures
- Post-op care

Clinical Pearls & Complications

- Proper placement techniques
- Managing bone loss & thin tissue
- Crown-to-root ratio & primary stability
- Use of implant guides
- Spinner issues, failure protocols, infection control
- Cover screws vs. abutments, implant removal

Hands-On Workshop

- Surgical kit review
- Instrumentation & drilling sequences
- Full surgical protocol practice

DAY 2: Live Surgery & Clinical Applications

Time: 8:00 AM – 3:00 PM

Location: 100 West Dental
13759 Manchester Rd Balwin, MO 63011

- Operatory setup & surgical flow
- Pre-op & post-op protocol review
- Live case demonstration with guided participation

INSTRUCTORS

Robert Reti DDS, FACS, FACD, FICD

Dr. Reti completed his general surgery and Oral & Maxillofacial surgery training at Tufts Medical Center in 2013, a pediatric and adult trauma level 1 hospital in Boston. During this time he was the Division I representative for the Resident Committee of the Academy of Oral & Maxillofacial Surgery. After completing his residency in 2013 Dr. Reti was selected for an advanced fellowship in Oral & Maxillofacial Surgery at Mercy Hospital in St. Louis, where he trained with some of the cities most respected facial cosmetic, maxillofacial and oculoplastic surgeons. It was during this time he was able to hone his advanced skills in dental implantology, TMJ disorders, bone grafting, facial trauma, obstructive sleep apnea and facial cosmetic surgery.

Brandon Prior, DMD

Dr. Prior earned his bachelor's degree in Biology at Southern Illinois University – Edwardsville. After college, he went on to complete his specialized Doctor of Medicine in Dentistry degree at Southern Illinois University School of Dental Medicine. Passionate about helping people experience life-changing dentistry, he has pursued advanced education and training in the areas of cosmetic solutions and dental implants. Dr. Prior has been involved in restoring and planning dental implant cases from single implants to complex full mouth rehabilitation using the latest technologies.
