

# TBS HANDS-ON CLINIC

BREAK THE MOLD

## ALVEOLAR RIDGE PRESERVATION GRAFTING FOR THE PRACTICING DENTIST

**Are you optimizing your post-extraction procedures to set the stage for future tooth replacement therapy?**

Join Dr. Jason Ford for this TBS Hands-On Clinic, where you'll master ridge preservation grafting. Learn how ARP grafting can prevent ridge resorption after extraction. Gain hands-on experience with minimally traumatic extractions, graft and membrane placement, and suturing to improve implant success and increase practice profitability.

### Course Objectives:

- ✔ Understand why alveolar ridge resorption occurs after extraction.
- ✔ Learn the steps that should be taken to minimize ridge resorption following tooth removal.
- ✔ Become exposed to the various types of materials needed for ARP.
- ✔ Be able to present to your patients the need for ARP.
- ✔ Understand the financial benefits of incorporating alveolar ridge preservation grafting into your practice.
- ✔ Have hands-on experience in the techniques of minimally traumatic extractions utilizing specially designed extraction instruments.
- ✔ Learn how to prepare an extraction socket to maximize the success of an ARP.
- ✔ Practice the techniques of ARP, including preparation and placement of bone and barrier membrane, as well as suturing techniques.
